

Julian, Industrial Management Assistant in his third year, talks about his training at Hauhinco

How was your start into the working life?

My start into the working life was a bit bumpy, as I have not gained any working experience prior to my training at Hauhinco. Thus I did not have a clue what to expect. However, this changed really fast, as I quickly had an overview on the tasks and relevant processes.

How were you welcomed in the company?

Very well! A nice and easy atmosphere among the colleagues enabled a quick integration into the company. The good relationship with my colleagues of course was the basis for a good start into my working life.

What tasks are part of your training?

As part of my training at Hauhinco to an Industrial Management Assistant I work in almost every department and thus have a wide variety of tasks. I learn a lot about the processes within the company, for example from buying goods to the usage of these goods within the production.

Would you choose Hauhinco again for your training and why?

Yes, I would definitely choose Hauhinco again for my training, because of the many opportunities to learn about the specific tasks and processes. Moreover, I am fully integrated into the processes of the different departments and thus very closely involved in the tasks. Due to the good working atmosphere, an integration in the different departments has been very easy. A great variety of departments and tasks stipulate the curiosity and are part of the company's core.

To what extent has the training been beneficial for you?

During my training I learned a lot. Many things that I learned at Hauhinco also help me in my daily life. For example, in the beginning it has not been easy for me to communicate with strangers. With the many customer contacts in my daily work life, I was able to work on my shyness. Today I am much more confident and act more open towards others. Working independently has led to a better self-organisation, which also enabled me to do daily tasks more easily.

"I am fully integrated into the processes of the different departments."

**Are you interested in a training at Hauhinco?
We would be pleased to advise you personally:**

Hauhinco Maschinenfabrik GmbH & Co. KG

Beisenbruchstraße 10
45549 Sprockhövel
